

COMPANY BACKGROUND

Thank you for affording us the opportunity to introduce **Cat Vision Security Pty Ltd.**

Cat Vision Security Pty Ltd was founded on the simple philosophy that the next platform of the economic growth in South Africa would be predominantly spearheaded by a new class of young previously disadvantaged South Africans if given opportunities.

THE QUESTION REMAINS “WHY US?”

Our strategy ensures that our clients are partnered with a progressive, proudly SA owned company, offering long term stability. We take into consideration cost, ease of installation and monitoring, as well as what customised solution offers the best security for any business. Be it to protect highly classified data within the Government, restricting access to certain areas or simple keeping track to criminals – CAT VISION can serve as an intricate part of your solution.

VISION

- Offer proactive-integrated security solutions that ensure safety and peace of mind to our valuable customers.
- Provide quality security services by deploying competent security personnel for the protection of property, personnel and information.
- Strive to be the customers preferred partner.

MISSION

We seek to develop critical mass in terms of equity ownership and performance in its chosen sector. We aim for operational excellence, empowerment through the transfer of skills and facilitation of opportunities for aspiring young entrepreneurs and on its profitability.

VALUES

- ACCOUNTABILITY
 - HONESTY
- PUNCTUALITY
 - QUALITY SERVICE
- ETHICS

GOALS

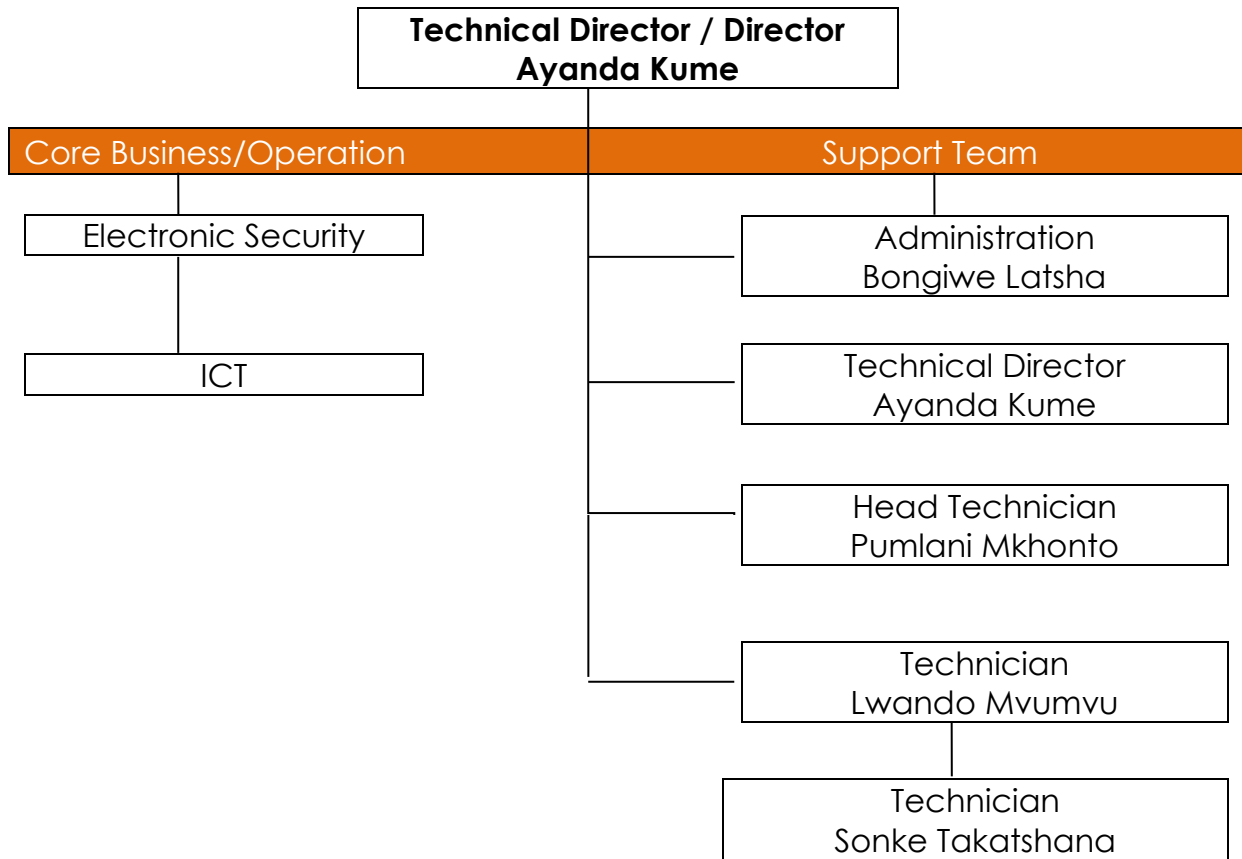

We at **Cat Vision Security Pty Ltd** commit to employ young South Africans especially previous disadvantage communities in the Alfred Ndzo district municipality and the Eastern Cape Province at large that are constantly facing poverty day by day.

OPERATION METHODOLOGY

Our approach to security is based on our in-house methodology developed over 9 years, which ensures that each customer risk is identified and proper mechanism are developed to counter such risk. This is further augmented by our quality security system and technology.

COMPANY ORGANOGRAM

CCTV solutions

We strive to keep up to date with the latest and best security cameras and video surveillance products available. We have a broad range of camera systems with various indoor, outdoor, infra red and recording servers that are tailored to your specific requirements, fitted by specialist: and we ensure installation of the highest standard. Our

professionals aim is to provide home and business owners with surveillance systems and the CCTV equipment that best suits their needs. So from analogue to IP, DVR to NVR's, monitors, and everything in-between; our solutions can be custom designed for large corporate, as well as medium-sized and small business. We specialize in supplying, servicing and maintaining a range of CCTV camera products. Whether you need a reliable CCTV camera for your home, small business or full scale camera system for medium to large scale enterprises, we have the CCTV technology, and expertise, to design the CCTV solution that's right for your business and your budget.

ACCESS CONTROL & BIOMETRIC SYSTEM

Protect your business assets and staff with sophisticated electronic access control. As a business has full control as to whom and during which hours of the day, they can access your office sites. The access control hardware is linked to your me & a endance so ware thereby ensuring a seamless end-to-end solution for detailed me-keeping.

Our range of biometric terminals includes face recognition, finger print and both. Biometric systems can be used for:

- access control, time and attendecy or both.

- Monitor doors and trigger locks.

Our sophisticated device and template management applications with powerful access control functionality offering optional T&A and lunch management modules.

INFORMATION AND COMMUNICATION TECHNOLOGY (ICT)

Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications and the integration and computers, as well as necessary enterprise software, middleware, storage and audiovisual, that enable users to access, store, transmit, understand and manipulate information.

ICT is also used to refer to the convergence of audiovisual and telephone networks with computer networks through a single cabling or link system.

DSTV & AUDIO, VISUAL INSTALLATION

We committed to delivering quality DSTV installations for home use and communal flats. Because how well your DSTV runs, is a direct reflection of the quality of your installation. We offer the following DSTV installation services:

- open view installation
- explorer with smart LNB
- communal DSTV
- Wi-Fi installations

- single view HD installations

We also offer specialise in audio visual equipment such as conference room design, PA system and projector system for both home use and offices.

At **Cat Vision** all our PA Systems are IP based and can be integrated with your CCTV system. This means that you can also access the system

remotely; enabling you to directly communicate with intruders and unexpected visitors outside normal working hours.

Microsound grew up with most of us. There's hardly a School Teacher, a Secretary or Principal that hasn't at some time or other addressed his students through a Microsound School Intercom System. Created in 1986 and has been producing good quality Products.

Known over the years for supplying reliable and locally manufactured intercom. Nurse-call, public address and access control products, Microsound now gears itself to face the new Millennium.

ALARMS

As each site and customer is different, we believe your alarm should be customised to you and your lifestyle. After an onsite assessment our salesman can advise you on which system will meet your requirements. We only use well supported known brands with a proven track record. Caddx, DSC and Paradox are our main brands and they offer a diverse number of options and functions. Although it is important to keep up with technology, we are always willing to make use of existing equipment if it is functional. Our systems make use of both internal and external detectors. Again we prefer to use top brands such as Optex, DSC and Paradox.

GATE AUTOMATIONS

Electric, automated gates are an easy way to ensure the security of your property. For those who find the security of their premises (be it residential or commercial) important, gate automation is the way to go. There are now also many features that can be added to ensure security as well as make gate automation more convenient.
